SCORING TABLE 1962 - decathlon men

SCORING TABLE 1962 - decathlon men

This Scoring Table for the Decathlon and other Men's track and field events was approved at the I.A.A.F. Congress in Belgrade in 1962. Since its primary purpose is for use in Decathlon Competitions, the ten Decathlon events have been collected together in the first part of the book, in the order in which the events are held. The other non-Decathlon events are set out in part II.

It will be noted that in some distance races and throwing events, all possible times and distances are not given. If, for example, in the Shot Put, the exact result is not stated in the table, the points score for the result immediately under should be awarded.

A Shot Put of 18.12m is thus scored by reading off the points value for 18.11m i.e. 966 points

A Discus throw of 60.56m is scored by reading off the points value for 60.51m

On the same principle, a time of 4:55.6 for the 1500 metres is scored by reading off the points value corresponding to a time of 4:55.7 i.e. 432 points.

In the case of the long throws—Discus, Javelin and Hammer—it will be noted that some performances are given in odd centimetres (for example Discus 60.57m) despite IAAF Rule 145 which demands that distances shall be recorded in even 2 centimetre units (62.44m, 62.46m etc.) The reason for this is that it was not until 1965 that the rule for measuring long throws in even centimetre units came into force, and by then the tables had already been in use for some time.

For the official result, it is correct to record a Discus, Javelin or Hammer throw to the nearest even centimetre below the distance covered. Thus, even though a Javelin thrower might have thrown 76.33m, this must be officially recorded as 76.32m. The points table is then consulted and the athlete credited with 949 points and not 950 points.

Intermediate Tables:

In 1970 the I.A.A.F. Technical Committee proposed that in view of the wide spread of points between the 1/10th sec. intervals in the Tables for the 100m and 110m hurdles (Decathlon) and 200m (Pentathlon) there should be an intermediate table of points for use where times are available from electrical timing to 1/100th sec.

The original standard table (1/10th sec.) awards 959 points for a performance of 10.4 sec. and 932 points for 10.5 sec. It is possible for one athlete to be 1/100th sec. slower than another—10.44 secs. and 10.45 secs.—and yet be separated by these 27 points. Under the Intermediate Table (1/100 sec.) there is only 2 points difference between the performances quoted.

In this 1977 Reprint of the Belgrade Tables, the 400m Intermediate Table is included for the first time, whilst the 200m (Men's Pentathlon) 1/100 sec. table has been omitted.

Upon consulting the Intermediate Tables, it may be noted that for some performances, there is a slight difference in points value between the Intermediate Table (1/100 sec.) and the standard Table (1/10 sec.). For example; the runner who does 14.3 secs. for 110m Hurdles in a hand timed race received 926 points according to the standard Table, whereas a runner who does 14.30 secs. timed electrically receives 927 points according to the Intermediate Table. These occasional variations stem from the fact that the Intermediate Table was compiled by computing to a greater number of decimal places than was the case for the standard Table. In most cases, however, the points values are identical.

SCORING TABLE 1962 - decathlon men

SCORING TABLE 1962 - decathlon men

Il est cependant correct dans le cas du lancement du disque, du marteau ou du javelot d'enregistrer les distances en unités de 2 centimètres à l'unité inférieure la plus proche pour le résultat officiel. Il s'ensuit donc que, même si un lanceur du javelot réussit 76.33m, ce jet doit être enregistré à 76.32m. On consulte alors la table de cotation et l'athlète se verra attribuer 949 points et non 950 points.

Tables Intermédiaires:

En 1970 le Comité Technique de la F.I.A.A. a estimé qu'en raison du grand écart de points représenté par un intervalle d'un dixième de seconde pour les 100 mètres et les 110 mètres Haies (Décathlon) et les 200 mètres (Pentathlon masculin) il devrait y avoir une Table Intermédiaire pour les performances enregistrées électriquement au centième de seconde. La Table Intermédiaire pour 400 mètres est incluse aussi dans cette réimpression de la Table de Belgrade, tandis que la table pour le 200m (Pentathlon) a été excluse.

Selon la Table initiale et standard, par exemple, 10.4 sec. (100 mètres) donne 959 points, tandis que 10.5 en donne 932. Il est possible qu'un athlète coure 1/100 sec. moins vite qu'un autre— 10.44 sec. contre 10.45 sec.— et qu'il reçoive néanmoins 27 points de moins que l'autre. Selon la Table intermédiaire au 1/100 seconde, il n'y a que 2 points de différence entre les deux performances citées.

En consultant la Table on peut remarquer que, dans le cas de certaines performances, il existe une légère différence entre la Table Intermédiaire (1/100 sec.) et la Table standard (1/10 sec.) Par exemple une performance de 14.3 secs. (110m Haies) chronométrée à la main vaut 926 points selon la Table standard, tandis que 14.30 secs. chronométrée électriquement vaut 927 points d'après la Table Intermédiaire. Ces légères différences résultent du fait que, lors de la compilation de la Table Intermédiaire (1/100 sec.) on a considéré un plus grand nombre de performances décimales qu'il en a été le cas lors de la compilation de la Table standard. Dans la plupart des cas, cependant, les Tables coïncident exactement.

Il est important de noter les règles suivantes

- (a) Lors d'une réunion où le chronométrage électrique entièrement automatique est en usage, la Table Intermédiaire doit être utilisée pour les performances de 100m, 110m Haies et 400m (Décathlon).
- (b) Lors d'une réunion où le chronométrage à la main (1/10 sec.) est en usage, la Table Standard est à utiliser pour toutes les épreuves.

Il est recommandé que, lorsque le chronométrage électrique entièrement automatique est en usage (et par conséquent la Table Intermédiaire pour les 3 épreuves ci-dessus) ce fait soit indiqué dans les résultats officiels.

La compilation d'une table de points permettant d'évaluer, aussi justement que possible, la valeur relative des performances athlétiques dans les différentes épreuves est une tâche difficile, comprenant non seulement une connaissance experte du sport mais aussi une aptitude considérable pour les mathématiques. En présentant cette Table pour un usage international, la F.I.A.A. tient à souligner son appréciation des efforts patients et méticuleux de M. Jörbeck (Suède) pour l'établissement du projet.

Londres, Mai 1977
